Profile

I'm passionate about the web. I've been working with various internet technologies for 20 years. My primary focus today is Linux systems administration, and building websites on Drupal and WordPress platforms. I'm excellent with PHP, JavaScript, CSS, MySQL and HTML 5. I'm comfortable on the Linux command line, MacOS, and Linux (Ubuntu) GUI interfaces.

Experience

Chief Technology Officer, Zenergy Works/Zentiv Agency: April 2013 - October 2016

I served as CTO for the largest web development company in the North Bay (CA) Area. During my time at Zenergy Works I was responsible for architecting, implementing, and hardening a multi-server hosting platform to provide secure, reliable and fast content delivery for their several hundred customers. I worked closely with clients and with colleagues to build a large number of complex database-backed websites and web applications.

Senior Software Developer, Nu-Designs Web Marketing: April 2005 - March 2013

I was employed for several years at Nu-Designs, a Sonoma County web development company. At Nu-Designs my responsibilities were quite varied. I performed front-end and back-end web development programming, produced web design mock ups in Adobe Photoshop, and was a Linux system administrator. I was primarily responsible for maintaining Nu-Designs' client base of several hundred web sites. During my time at Nu-Designs I was directly involved with building over 100 sites on the Drupal CMS platform. I was solely responsible for building high-traffic sites that regularly log over 1 million monthly page impressions and tens of thousands of unique monthly visitors.

Web Developer, Media Speak: 2005 - 2009

I worked as a consultant and web developer for this New York-based media company servicing the financial industry.

Web Developer, MadMerch: 2002 - 2005

MadMerch was an online merchandising company. MadMerch served as a central e-commerce platform for hundreds of independent merchants. The company maintained a physical warehouse in the Los Angeles area and provided customers with a complete, end-to-end e-commerce fulfillment service. I wrote all the website code, including a custom e-commerce storefront to manage hundreds of vendors and tens of thousands of products.

Co-Founder, (mt) Media Temple: 1998 – 2002

I co-founded Media Temple with 2 partners and was their original designer and programmer. Media Temple grew from zero customers to over 10,000 during my time there. Today, Media Temple is owned by GoDaddy.

Co-Founder, New Music Web: 1998 – 2000

New Music Web was an early "dot com" company promoting independent musicians. New Music Web distributed music via MP3 format and also served as a promotional service for musicians. I wrote all the website code, including a PHP-based CMS and a custom streaming music player.

Digital Color Specialist, Olyoptics: 1993 – 1999

I was a digital color specialist for the comic book industry. I worked on high-profile titles such as Spawn, Akira, Batman, Justice League, and many others.

Education

1991-1993

Attended Santa Rosa Junior College with a focus on Fine Art.

1990

Graduated from Montgomery High School, Santa Rosa, California.

Skills

Over the years I've worked with a wide variety of internet technologies. My strengths are HTML, CSS, JavaScript, jQuery, MySQL, PHP, Drupal, WordPress, and CakePHP. I'm a formidable Linux systems administrator. I can make your web hosting network fast, reliable, and secure. I have strong skills with version control systems such as Git and SVN. I have excellent communication skills, and am enthusiastic about my work. I'm punctual, organized, and reliable. I am an excellent writer and have on occasion written website copy of behalf of clients.
